

UNDERSTANDING YOUR LOCAL SOILS

WHAT ARE THE LIMITING FACTORS? (FREE)

MONDAY 19TH OCTOBER 2020
BOREE CREEK

Neighbours exchange ideas!

Know your local soils. Our facilitators David Hardwick (Agroecologist) and David Waters (Mli) will blend scientific knowledge with the local knowledge (analysis done last month) to provide hands on information on soil properties and soil health, how this affects pasture growth and what you can do to enhance your soil. We will also find out the impact of different farming practices on soil health and livestock production. Soil is an asset and we need it in good condition.

Come and join us! We have room for 15 participants.

Morning tea and lunch provided (Free). Hand sanitiser and social distancing essential. So, save the day! RSVP essential.

14 Local Boree Creek soils have been sent for analysis

Chemical and Biological tests have been completed

Paddock history recorded.
What's the verdict?
How is the soil health?

Bring your own soil sample 20x20x20cm from your farm

WHERE

Boree Creek Hotel
then farm walk

WHEN

Monday the 19th of October
9am – 2.30pm
